Volume 71, No 1, 2022

POLISH ACADEMY OF SCIENCES
COMMITTEE ON GEODESY

CONTENTS

Original paper

Benon Bogdan, Anna Barańska, Anna Przewięźlikowska – Transmission easement: overview of subject matter and methods of establishing encumbrance – Polish case e11

Review paper

Olena Boyko, Dmitry Prusov, Borys Chetverikov, Maria Malanchuk – Conceptual principles of geospatial data geoinformation integration for administrative and economic management of transport infrastructure facilities e12

Original papers

Vsevolod Burachek, Dmytro Khomushko, Oleksiy Tereshchuk, Sergìy Kryachok, Vadim Belenok – Analysis of development tendencies of metrological technologies to control rangefinders of an electronic distance measurement instruments e13

Andrzej Kwinta, Joanna Bac-Bronowicz – Simplification of 2D shapes with equivalent rectangles e14

Gabriel Weiss, Slavomir Labant, Juraj Gasinec, Hana Stankova, Pavel Cernota, Erik Weiss, Roland Weiss – Establishment of local geodetic networks based on least-squares adjustments of GNSS baseline vectors e15

Polina Lemenkova – Mapping Ghana by GMT and R scripting: advanced cartographic approaches to visualize correlations between the topography, climate and environmental setting e16

Robert Duchnowski, Patrycja Wyszkowska – Absolute M_{split} estimation as an alternative for robust M-estimation e17

Oksana Drebot, Olena Zubova, Halyna Khant, Vitalii Hurelia, Nadiya Sknypa – Analysis of the agricultural land use in Ukraine on the example of the united community e18

Oluibukun Gbenga Ajayi, Emmanuel Oruma – On the applicability of integrated UAV photogrammetry and automatic feature extraction for cadastral mapping e19

Agnieszka Bitner, Malgorzata Frosik – Real estate valuation algorithm for large local markets e20

Borys Chetverikov, Ihor Trevoho, Lubov Babiy, Mariia Malanchuk – Methodology for determining deforestation areas in Lviv region using remote sensing data e21

Patrycja Wyszkowska, Robert Duchnowski – Two variants of M_{split} estimation – similarities and differences e22
