

## CONTENTS

### Special Section

- e145764 Editorial: Recent advances in structural control and health monitoring**  
Jan HOLNICKI-SZULC, David WAGG, Fabio CASCIATI, Lucia FARAVELLI, and Łukasz JANKOWSKI
- e144617 Some recent developments in inerter-based devices for vibration mitigation**  
David J. WAGG
- e144619 The optimization of the TMDI for efficient mitigation of the vibration**  
Konrad MNICH and Przemysław PERLIKOWSKI
- e144605 Flywheel proof mass actuator for active vibration control**  
Aleksander KRAS and Paolo GARDONIO
- e143555 Comparing the efficiency of different structural skeletons for base-isolated domes**  
Sara CASCIATI
- e144615 Human-induced force reconstruction using a non-linear electrodynamic shaker applying an iterative neural network algorithm**  
César PELÁEZ-RODRÍGUEZ, Álvaro MAGDALENO, Sancho SALCEDO-SANZ, and Antolín LORENZANA
- e144606 Ensemble of feature extraction methods to improve the structural damage classification in a wind turbine foundation**  
Jersson X. LEON-MEDINA, Núria PARÉS, Maribel ANAYA, Diego A. TIBADUIZA, and Francesc POZO
- e144118 Coda wave interferometry in monitoring the fracture process of concrete beams under bending test**  
Magdalena KNAK, Erwin WOJTCZAK, and Magdalena RUCKA
- e144940 Experimental dynamic damage assessment of PUFJ protected brick infilled RC building during successive shake table tests**  
Arkadiusz KWIECIEŃ, Zoran RAKICEVIC, Jarosław CHEŁMECKI, Aleksandra BOGDANOVIC, Marcin TEKIELI, Łukasz HOJDYS, Matija GAMS, Piotr KRAJEWSKI, Filip MANOJLOVSKI, Antonio SOKLAROVSKI, Omer Faruk HALICI, Theodoros ROUSAKIS, and Vachan VANIAN
- e144616 Dynamic displacement tracking in viscoelastic solids by actuation stresses: a one-dimensional analytic example involving shock waves**  
Hans IRSCHIK and Michael KROMMER
- e144620 Motion tracking of a rigid-flexible link robotic system in an underactuated control mode**  
Elżbieta JARZĘBOWSKA, Krzysztof AUGUSTYNEK, and Andrzej URBAŚ

### Material Science and Nanotechnology

- e145563 Effects of HE and ECAP processes on changes in microstructure and mechanical properties in copper, iron and zinc**  
Mariusz KULCZYK, Monika SKORUPSKA, Jacek SKIBA, Sylwia PRZYBYSZ, and Julita SMALC-KOZIOROWSKA
- e145564 Electrochemical behavior and morphology of selected sintered samples of  $Mg_{65}Zn_{30}Ca_4Pr_1$  alloy**  
Bartłomiej HRAPKOWICZ, Sabina LESZ, Aleksandra DRYGAŁA, Małgorzata KAROLUS, Klaudiusz GOŁOMBEC, Rafał BABILAS, Julia POPIS, Adrian GABRYŚ, Katarzyna MŁYNAREK-ŻAK, and Dariusz GARBIEC
- e144609 Influence of spatial distribution and the type of material on the occurrence of bandgaps in phononic crystals**  
Sebastian GARUS, Wojciech SOCHACKI, Paweł KWIATON, Marcin NABIALEK, Jana PETRU, and Mariusz KUBANEK

### Control, Robotics and Informatics

- e145562 Towards mass customization: automatic processing of orders for residential shipping containers – a case study example**  
Adam DUDEK, Justyna PATALAS-MALISZEWSKA, and Jacek FRĄCZAK
- e145682 Algorithm for solution of systems of singularly perturbed differential equations with a differential turning point**  
Valentyn SOBCHUK, Iryna ZELENSKA, and Oleksandr LAPTIEV

### Electronics, Telecommunication and Optoelectronics

- e145568 Handling high- and low-priority traffic in multi-layer networks**  
Edyta BIERNACKA, Piotr BORYŁO, Piotr JURKIEWICZ, Robert WÓJCIK, and Jerzy DOMZAŁ
- e145566 Simulation of a cylindrical glass dome negative impact on a 360° field of view 2D laser scanner performance and a method for correction**  
Jacek WOJTANOWSKI

### Power Systems and Power Electronics

- e145569 An efficient microgrid model based on Markov fuzzy demand-side management**  
G.K. JABASH SAMUEL, M.S. SIVAGAMA SUNDARI, R. BHAVANI, and A. JASMINE GNANAMALAR
- e145565 Impact of thermal backfill parameters on current-carrying capacity of power cables installed in the ground**  
Seweryn SZULTKA, Stanisław CZAPP, and Adam TOMASZEWSKI

### Civil Engineering

- e145570 Optimization programming tools supporting supply chain management**  
Joanna SZKUTNIK-ROGOŹ and Jerzy MAŁACHOWSKI

### Mechanical and Aeronautical Engineering, Thermodynamics

- e145684 Sub-optimal motion planning of one-chained, two-input nonholonomic systems**  
Ignacy DULEBA and Iwona KARCZ-DULEBA
