

CONTENTS

Technological Experiments on Duct Injection Methods of Reducing Emission of Sulfur Dioxide from Boiler OP-430 Flue Gases – Mieczysław Adam Gostomczyk, Wioletta Ziaja	7
Studies on Biofiltration of Waste Gases Containing Toluene and Xylene – Andrzej Wieczorek	21
Properties of Particulate Matter and Heavy Metals Emission from the Process of Coal Combustion in Residential Furnaces – Stanisław Hławiczka, Krystyna Kubica, Urszula Zielonka, Krzysztof Wilkosz	29
Identification of the Directions of the Air Pollution Inflow Using Measurements of Short Averaging Time – Czesław Kliś, Mieczysław Żeglin	47
Studies and Usability of Settler with Lamella Packing Plates Type – Jan Hehlmann, Andrzej Bryczkowski, Edyta Kujawska	61
Heavy Metals in the Surface Run-off from the Basin Area and in the Water of the Nakło-Chechło Reservoir – Agata Domurad, Maciej Kostecki	81
The Limnological Characteristic of the Plawniowice Dam-Reservoir (Upper Silesia, Poland) – Thermal and Oxygen Conditions after 23 Years of Exploitation – Maciej Kostecki	97
Hydro-Chemical Characteristics of the Potok Toszecki in Aspect of Influence on the Plawniowice Reservoir – Maciej Kostecki, Jerzy Kozłowski, Agata Domurad, Bartłomiej Zych	125
Magnetic Susceptibility Measurement on Ombrothrophic Peat in Monitoring of Industrial Immission – Zygmunt Strzyszczyk, Tadeusz Magiera	141

Communications

Zinc in Soil around Non-Ferrous Metals Smelter „Miasteczko Śląskie” – Edyta Sierka, Bernard Palowski, Tadeusz Kimsa	169
Characteristic of the Properties of Serpentine Soils on the Nasławice Quarry Dumps in the Context of their Reclamation – Cezary Kabała, Tomasz Szlachta	175
