CONTENTS: SPECIAL SECTION on Recent advances in electromechanical energy conversion systems

Recent advances in electromechanical energy conversion systems

Jan Sykulski, Jacek Rąbkowski

EMF signature analysis in a marine-type brushless synchronous generator for online fault detection

Filip Kutt, Michał Michna, Grzegorz Kostro

Experimental studies on reducing permanent magnet losses through segmentation in a fractional slot PMSM with high power density

Tomasz Wolnik, Tomasz Jarek, Jan Mikoś, Vitezslav Styskala

Analysis of the impact of the method of manufacturing a rotor on the parameters of an AC IPM machine

Mariusz Korkosz, Adrian Młot, Elżbieta Sztajmec, Karol Ryłło

Study on properties of multipole switched reluctance motor designed for multichannel operation – single channel operation analysis

Mariusz Korkosz, Piotr Bogusz, Jan Prokop, Piotr Zasowski

Three-axis forces and torque sensor

Paweł Młotek, Piotr Mynarek, Marcin Kowol

A flying start method for sensorless induction machine-based electric drives

Daniel Wachowiak

Slip compensation technique in five-phase induction motors drive system

Krzysztof Blecharz, Roland Ryndzionek, Paul Gondran, Imad Merzouk

Sensorless control with multi-scalar transformation of five-phase IPMSM

Deepak Vyas, Sahal Ibn Islam Joy, Marcin Morawiec, Grzegorz Kostro, Łukasz Sienkiewicz, Nirav Joshi

Energy efficiency of supercapacitors in hybrid energy storage systems

Mirosław Lewandowski, Marek Orzydłowski, Tadeusz Maciołek

Processing and analysis of trolleybus traction data using LINQ technology

Andrzej Wilk, Mikołaj Bartłomiejczyk, Jacek Skibicki, Leszek Jarzębowicz, Dariusz R. Karkosinski, Łukasz Hupka, Jan Hupka, Paweł Kaczmarek, Natalia Karkosinska-Brzozowska

Multilevel voltage source inverter with coupled reactors using coarsely quantized pulse amplitude modulation

Krzysztof Jakub Szwarc, Artur Cichowski, Paweł Szczepankowski, Janusz Nieznański, Ryszard Strzelecki
